

NX CHARTER SCHOOL BUS TRACKER®

Getting Started, FAQ & Troubleshooting for Parents/Guardians

Getting Started and FAQ

1. What is NX Charter School Bus Tracker (NXBT)?

NX Charter School Bus Tracker is an application (app) developed to help improve communication with families. This app will securely allow parents/guardians to view the location of their student's bus in relation to their assigned bus stop as well as provide information about their routes, in near real-time, including the scheduled arrival time of each stop. The application is user friendly and available at no additional charge (mobile carrier data charges may still apply).

2. How does NXBT work?

NXBT works with the GPS technology currently installed on the NX Charter School buses. More specifically, NXBT reads the GPS signals of the bus in motion to provide you with the location of the bus while in route. The relayed GPS data is then pushed through a routing system and then to you via the NXBT app in near real-time.

3. How much does NXBT cost?

The service is free of charge to parents/guardians and provided at no additional cost to the school districts serviced by NX Charter. Please note, associated data charges from cell phone carriers may still apply and are the responsibility of the parents/guardians.

4. Is NXBT secure?

The NXBT app is set up so security information (username and password, along with individual student name(s) and student ID number(s) and the location) must be provided before the bus location can be viewed. This helps to ensure that only parents and guardians of students assigned to specific bus route(s) are able to view the location of their student's bus.

5. Do we have to use NXBT?

No, NXBT is voluntary.

Getting Started, FAQ & Troubleshooting for Parents/Guardians

6. What platforms does NXBT run on?

NXBT currently runs on Apple (iOS), Google (Android) and in a Standard Web Browser such as Internet Explorer, Chrome or Firefox.

7. Is NXBT going to track my students

No, the app only tracks the actual school bus and not the individual children on the buses.

8. If I have more than one child, can I view all of them on NXBT?

Yes, you can view all of your children's buses simultaneously from one device.

9. Is the data real-time?

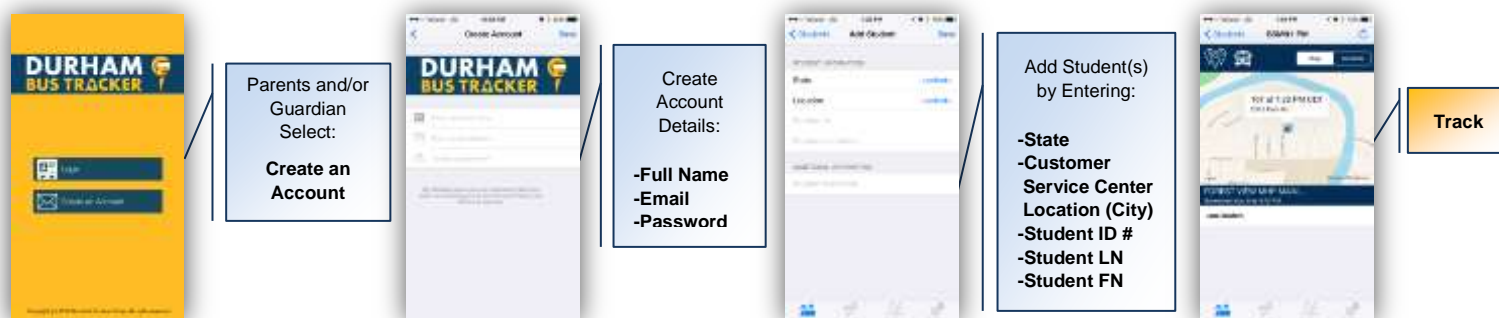

NXBT displays the location of the bus as accurately as possible. Based on some technology limitations such as cellular signal and other factors, a 15 second to two minute delay can occur. While rare, in extreme cases where no cell service is available, there could be greater than a two-minute delay. In most situations, the location of the bus will be accurate to 8 – 25 seconds.

10. Will NXBT send notifications when a bus is running late?

Not automatically, however your team at NXBT does have the ability to send notifications notifying of these types of events to be proactive as possible.

11. How do I setup NXBT?

The NXBT application setup is very simple. First, you, as parents/guardians, download the app from the Apple App Store, Google Play Store or view it on a Web Browser. Next, you create a **secure** Username and Password for the application. Lastly, you enter the student's name, school issued ID number, city customer service center is located and state and start tracking the bus(es).

12. How does the NXBT work when my child is on a substitute bus?

If NXBT Charter sends a substitute bus rather than the assigned bus on a route, it will do its best to work through the system changes as quickly as possible. However, there may be a delay in updating.

13. Whom do I call for technical support, questions, comments or feedback?

Please contact us at nxbt@NXSchoolBusTracker.com

Troubleshooting

1. Trouble signing in?

If you have forgotten your password, please click [here](#) and enter your email address and we will send you instructions on how to reset your password.

If you have forgotten your username, enter the email address associated with your account.

Still having issues? Please contact us at nxbt@NXSchoolBusTracker.com.

2. Page not appearing correctly?

NXBT works on most modern web browsers such as Google Chrome, Internet Explorer, and Firefox. If it appears as though this site is not displaying correctly, try refreshing the browser or using another web browser.

Still having issues? Please contact us at nxbt@NXSchoolBusTracker.com.

3. Bus appearing somewhere it is definitely not?

NXBT uses global positioning systems (GPS) that are onboard our school buses. If this happens, please contact us at nxbt@NXSchoolBusTracker.com. Please note, there are currently a few drawbacks to the system and we are working with the developer to address these issues. For example, if a bus is removed from service for maintenance and a back-up bus is used for the route, your child's bus will indicate a bus stationed in the bus lot. In other words, you will not be able to track the bus while it is out of service and the sub bus won't be in the system for you to track. The second is a three-minute delay of information. Please understand, for security reasons "real-time" is dictated and regulated by the federal government. Finally, as mentioned earlier, our late start and early release day schedules won't be reflected in the app.

4. Can't register your student?

The NXBT system receives student information from your local district. If you cannot find your student, please verify your student's information and try again.

5. Did you receive an error?

If you received an error, please try your action again. If you are still experiencing troubles, please contact us at nxbt@NXSchoolBusTracker.com. If this site receives an error, NX Charter School's web support team is immediately notified.

6. Page not found?

If you get an error stating page "not found", please verify your URL and try your request again. If you continue to experience issues, please contact us at nxbt@NXSchoolBusTracker.com.

7. Why isn't NXBT available for my bus?

NX Charter School Services works hard to provide this technology to every school district. If your district does not yet have this option available, please contact your school district for more information.

8. Does NXBT utilize SSL?

Yes, NXBT utilizes the technology of SSL Certificates to provide a safe and secure browsing environment.
